

LIMIT PROFILE CONFIGURATION

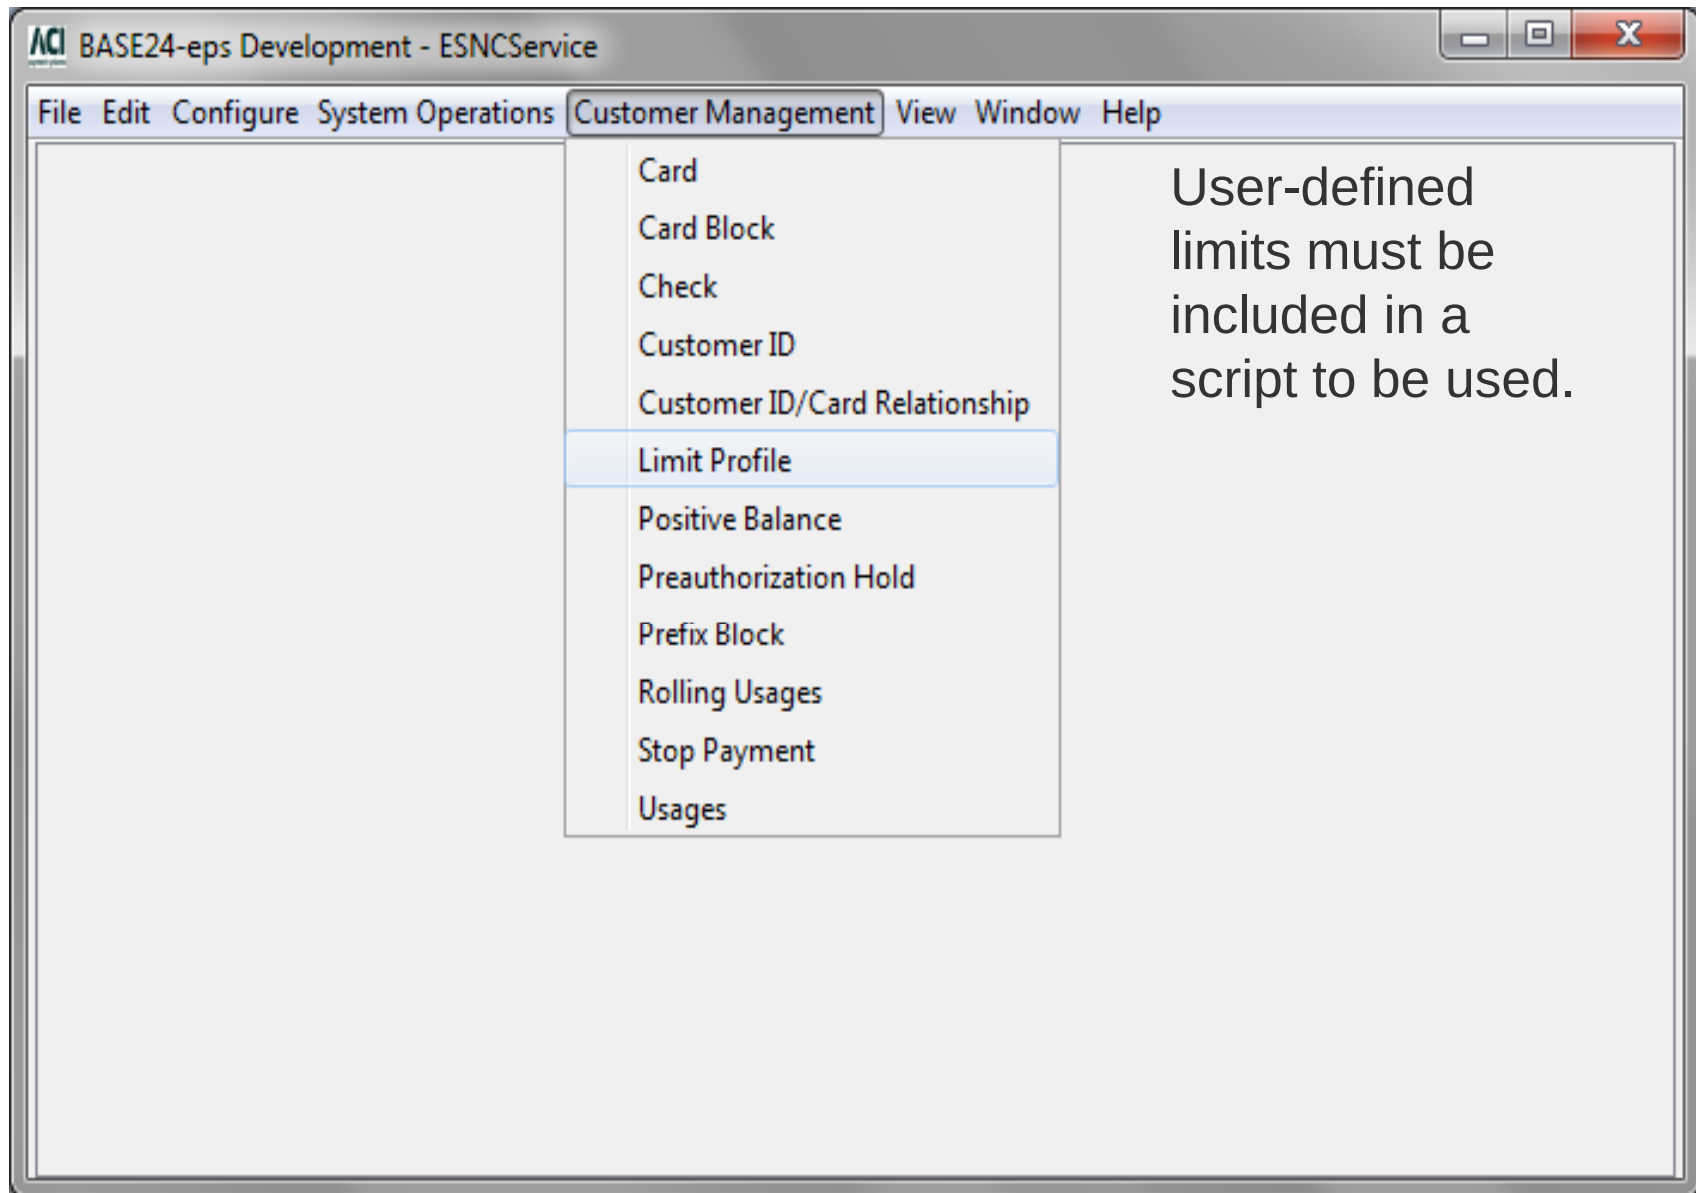

Limit Profile

- Limit Profile is used to configure fixed and rolling limits:
 - name
 - amount
 - currency code
 - count
 - usage period
 - period option
- Fixed Limits are defined relative to a usage period that remains static from start to end date/time. Rolling limits are defined relative to a usage period whereby the start and end date/times can move based upon the occurrence of the transaction.
- Limits are not shared amongst profiles. If the same limit is to be part of multiple profiles, it must be defined in each profile.

Limits Configuration

Limits Configuration

The screenshot displays two windows from the ACI BASE24-eps Development - ESNService application. The top window, titled 'Limit Profile Management - DEP_CR_LMT_PRFL', shows a table of limit profiles for institution BNK1 (FIRSTSTATEBANK). The bottom window, titled 'Limit Profile Management - R_PROFILE_1', shows a table of limit profiles for institution BNK101 (TEST).

Limit Profile Management - DEP_CR_LMT_PRFL

Limit Name	Limit Amount	Limit Count	Usage Period	Period Option
DEP_CR_AMT_PRD	0.00 USD		Fixed number of days	3
DEP_CR_NUM_PRD	0.00 USD	1	Fixed number of days	3
DEP_CR_PCT	0.50 USD		Fixed number of days	3
DEP_CR_PCT_CD	50.00 USD		Usages not Cleared	
MAX_CR_DEP_CD	75.00 USD		Fixed number of hours	
MAX_CR_PER_DEP	120.00 USD		Fixed number of days	
MAX_DEP_CR_AMT	250.00 USD		One Week	
MAX_DEP_CR_NUM	0.00 USD	3	Two Weeks	
			1st and 15th of each month	
			Every month	
			Every 3 months	

Limit Profile Management - R_PROFILE_1

Limit Name	Limit Amount	Limit Count	Usage Period	Period Option
MAX_WDL_AMT	1,000.00 USD		Rolling number of days	1
MAX_WDL_CNT	0.00 USD	5	Rolling number of hours	12

User-defined limits must be included in a script in order to be used.

Limits Configuration

The Limit Profile usage period determines how long usages are considered active.

CASH_ADV_INCR	1.00 USD		Fixed number of days	1
DEP_CR_AMT_P...	1,000.00 USD		Fixed number of days	1
DEP_CR_AMT_P...	1,000.00 USD		Fixed number of days	1
DEP_CR_NUM_P...	1.00 USD		Fixed number of days	1

6 - Successful view of CDH_LIMIT_PRFL.

The Balance and Cutover End Time and Usage Cutover Offset determine the time during the day when the fixed usage period ends.

Limits Configuration

- The rolling usage period begin and end time is determined based upon the type of period, as follows:
 - *Rolling Number of Minutes* rolls on the minute (e.g., 00:00:00 – 00:00:59)
 - *Rolling Number of 2-Minute Intervals* rolls on the even minute (e.g., 00:00:00 - 00:01:59)
 - *Rolling Number of Hours* rolls on the hour (e.g., 00:00:00 - 00:59:59)
 - *Rolling Number of Days* rolls at midnight (e.g., 03/02/2012 00:00:00 - 03/02/2012 23:59:59)
 - *Rolling Number of Weeks* rolls at midnight on Sunday morning (e.g., 00:00:00 Sunday - 23:59:59 Saturday)
 - *Rolling Number of Months* rolls at midnight on the first day of each month (e.g., 02/01/2012 00:00:00 - 02/29/2012 23:59:59)

LIMIT PROFILE CONFIGURATION

Usage Data Source

Usages

- Usages displays the current values of the usages associated with a cardholder, account, and customer ID

Fixed Usage

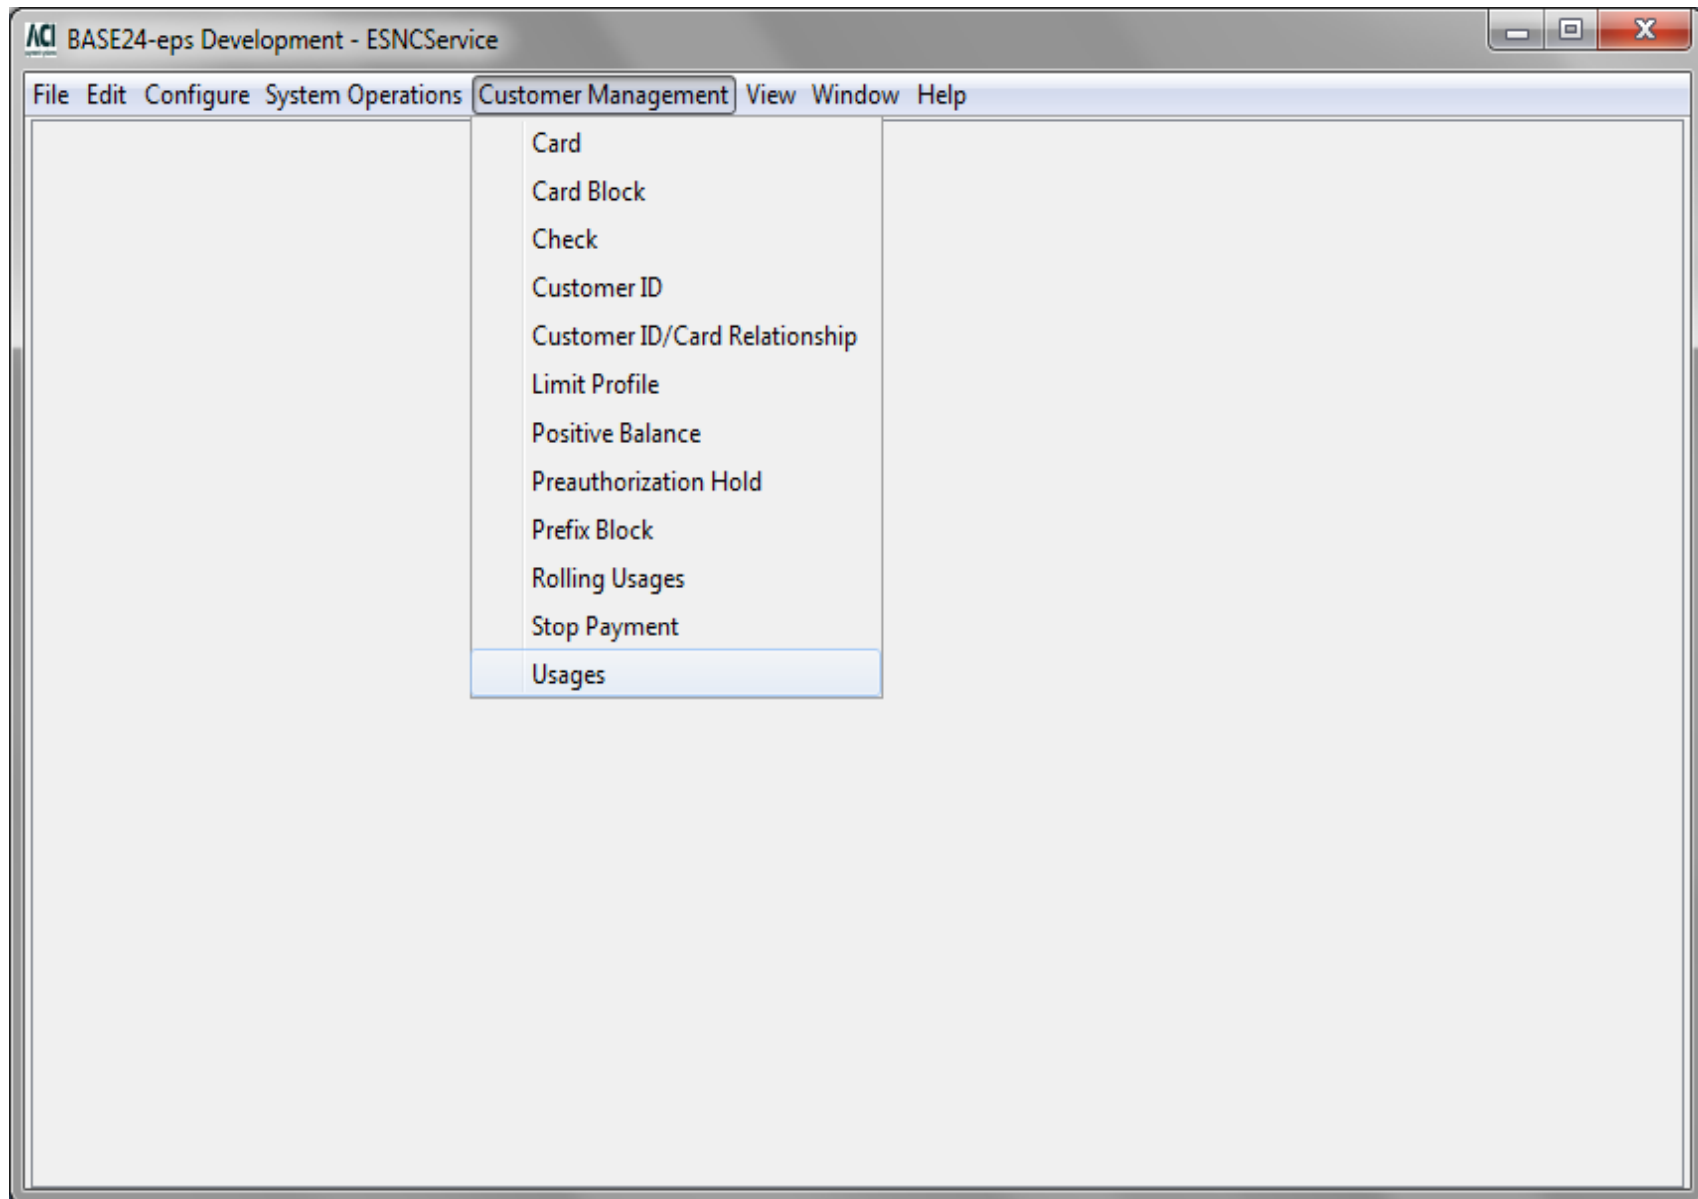

- name
- amount
- count
- next begin date and time

Rolling Usage

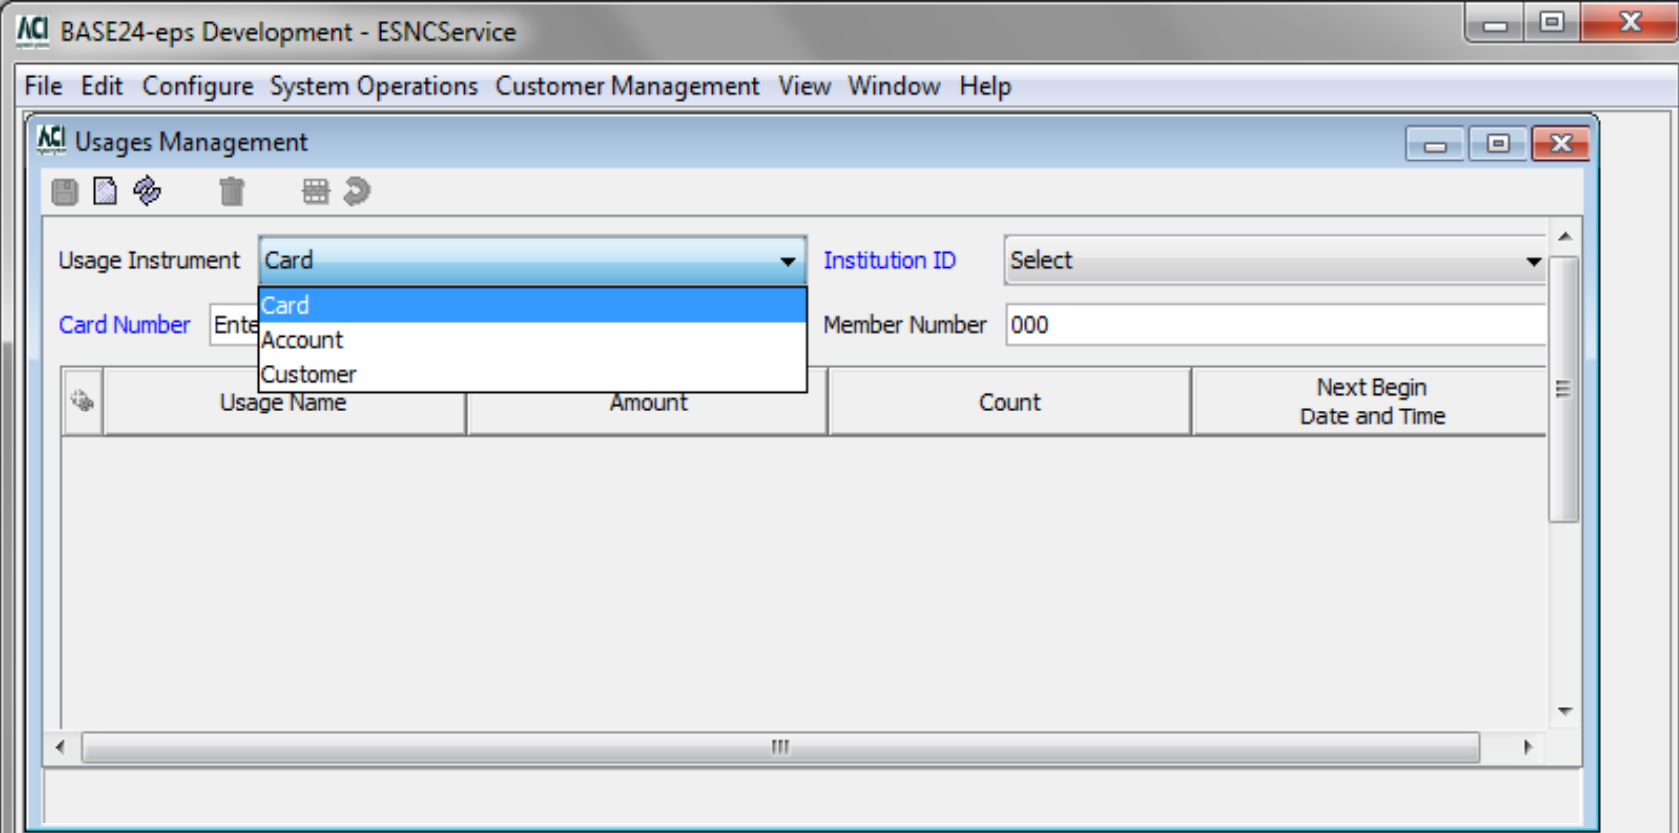

- name
- type of period
- number of periods
- accumulated amounts or counts per period

Usages

Usages

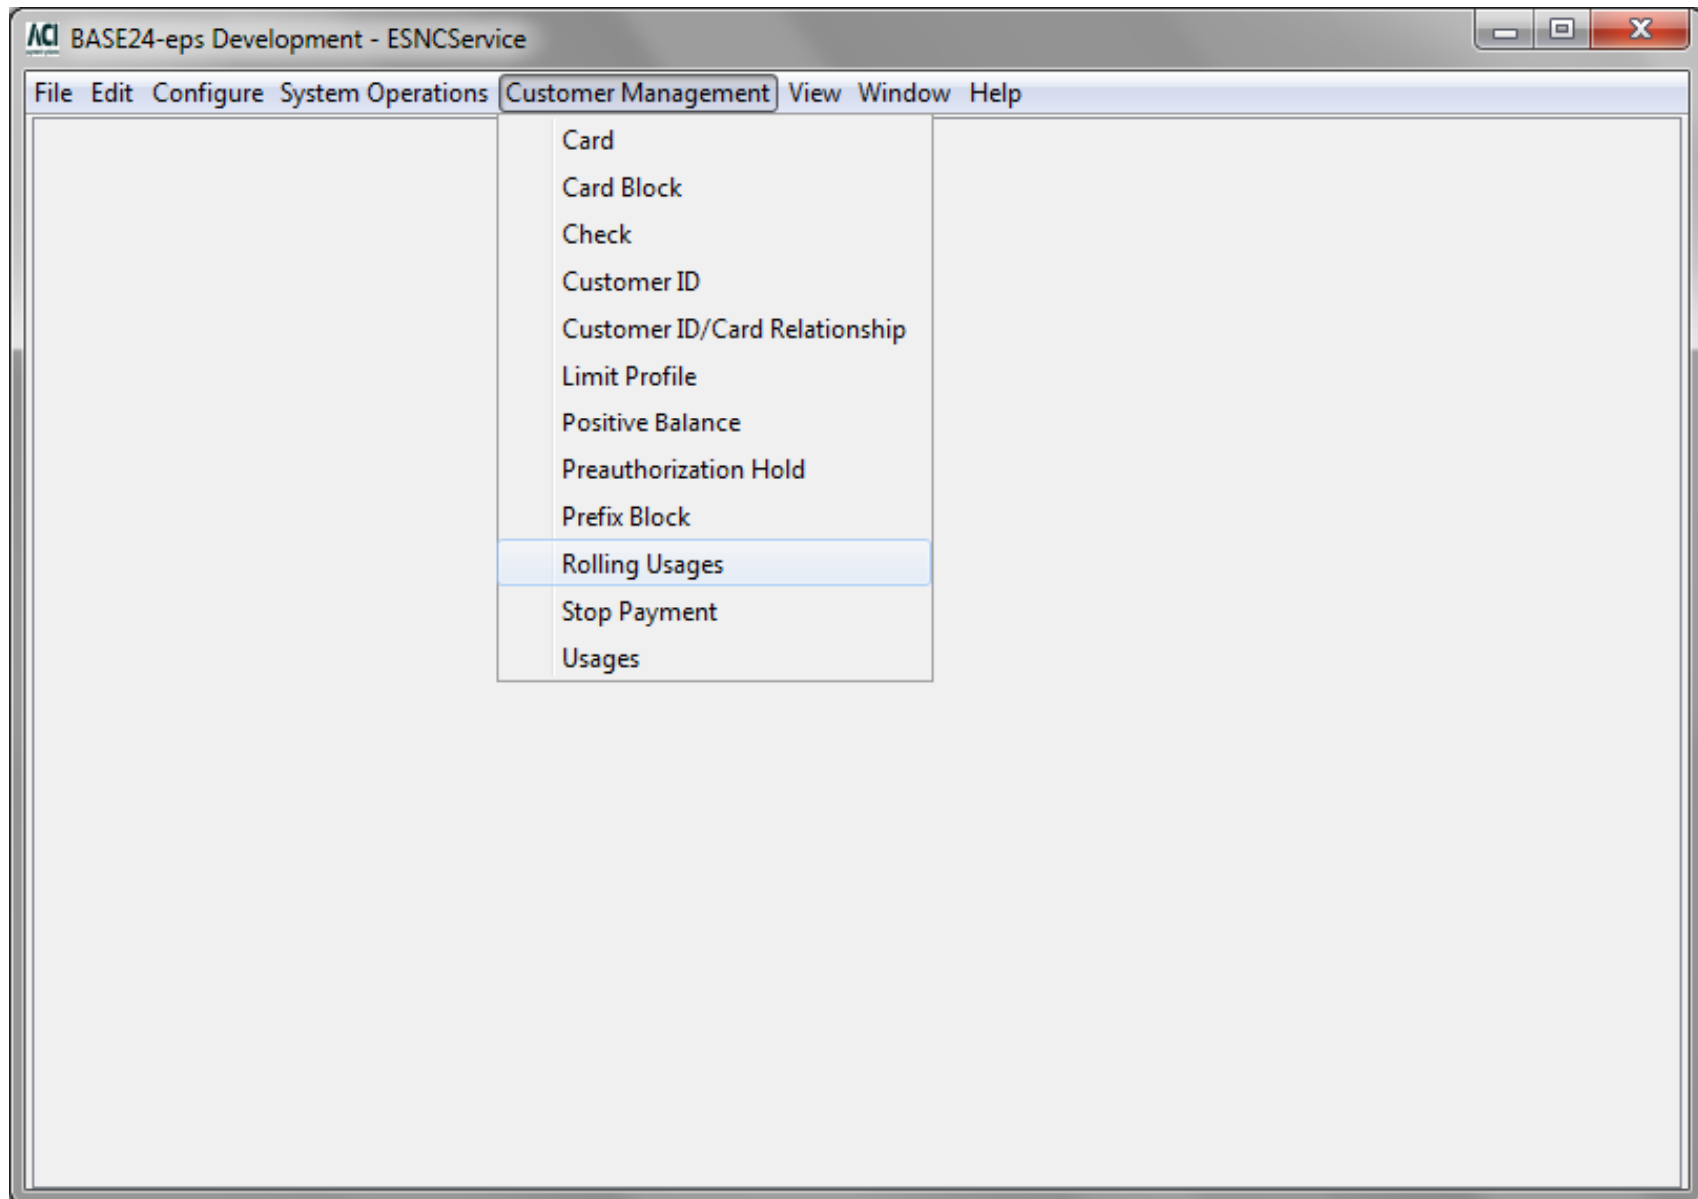

The screenshot shows a software window titled "BASE24-eps Development - ESNCSERVICE" with a menu bar (File, Edit, Configure, System Operations, Customer Management, View, Window, Help). Inside, there is a sub-window titled "Usages Management".

The "Usages Management" window contains a toolbar with icons for file operations. Below the toolbar, there are input fields for "Usage Instrument" (a dropdown menu with "Card" selected and a list showing "Card", "Account", and "Customer"), "Institution ID" (a dropdown menu with "Select"), "Card Number" (a text field with "Ente"), and "Member Number" (a text field with "000").

Below these fields is a table with the following headers: "Usage Name", "Amount", "Count", and "Next Begin Date and Time". The table body is currently empty.

Fixed customer usages are written to this data source. Usages are created and updated in scripts. Current usage amounts and counts for cards, accounts, and customer IDs are viewed here.
