Card Configuration

The screenshot displays a software window titled "BASE24-eps Development - ESNCSERVICE". Inside, a sub-window titled "Card Management - 123456*****6789 - 000" is active. The sub-window has a menu bar with "File", "Edit", "Configure", "System Operations", "Customer Management", "View", "Window", and "Help". Below the menu is a toolbar with icons for save, print, undo, redo, delete, and refresh. The main area contains a form with the following fields:

- Institution ID:** A dropdown menu showing "BNK1 (FIRSTSTATEBANK)".
- Card Number:** A text field containing "123456789123456789".
- Member Number:** A text field containing "000".
- Tabs:** A set of tabs labeled "General", "Status", "Accounts", "Limits", "Address", and "Address (Locale)". The "Address" tab is currently selected.
- Address Verification:** A section with a checkbox labeled "Use Address Verification" which is unchecked.
- Address:** A text field containing "330 S 108th Avenue".
- City:** A text field containing "Omaha, NE".
- Postal Code:** A text field containing "68144".

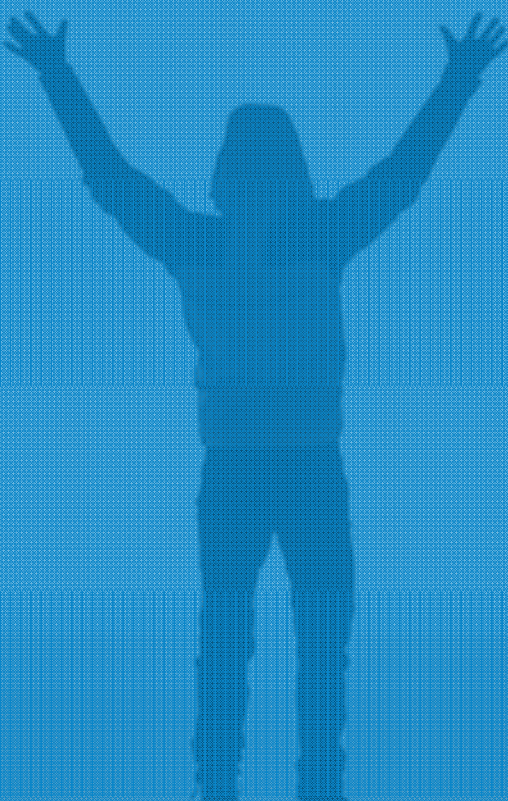

At the bottom of the sub-window, a status bar displays the message: "13 - Successful view of 123456*****6789 - 000."

CUSTOMER MANAGEMENT CONFIGURATION

Usage Data Source

Usages

- Usages displays the current values of the usages associated with a cardholder, account, or customer ID:
 - name
 - current usage (amount or count)
 - currency
 - next begin date and time

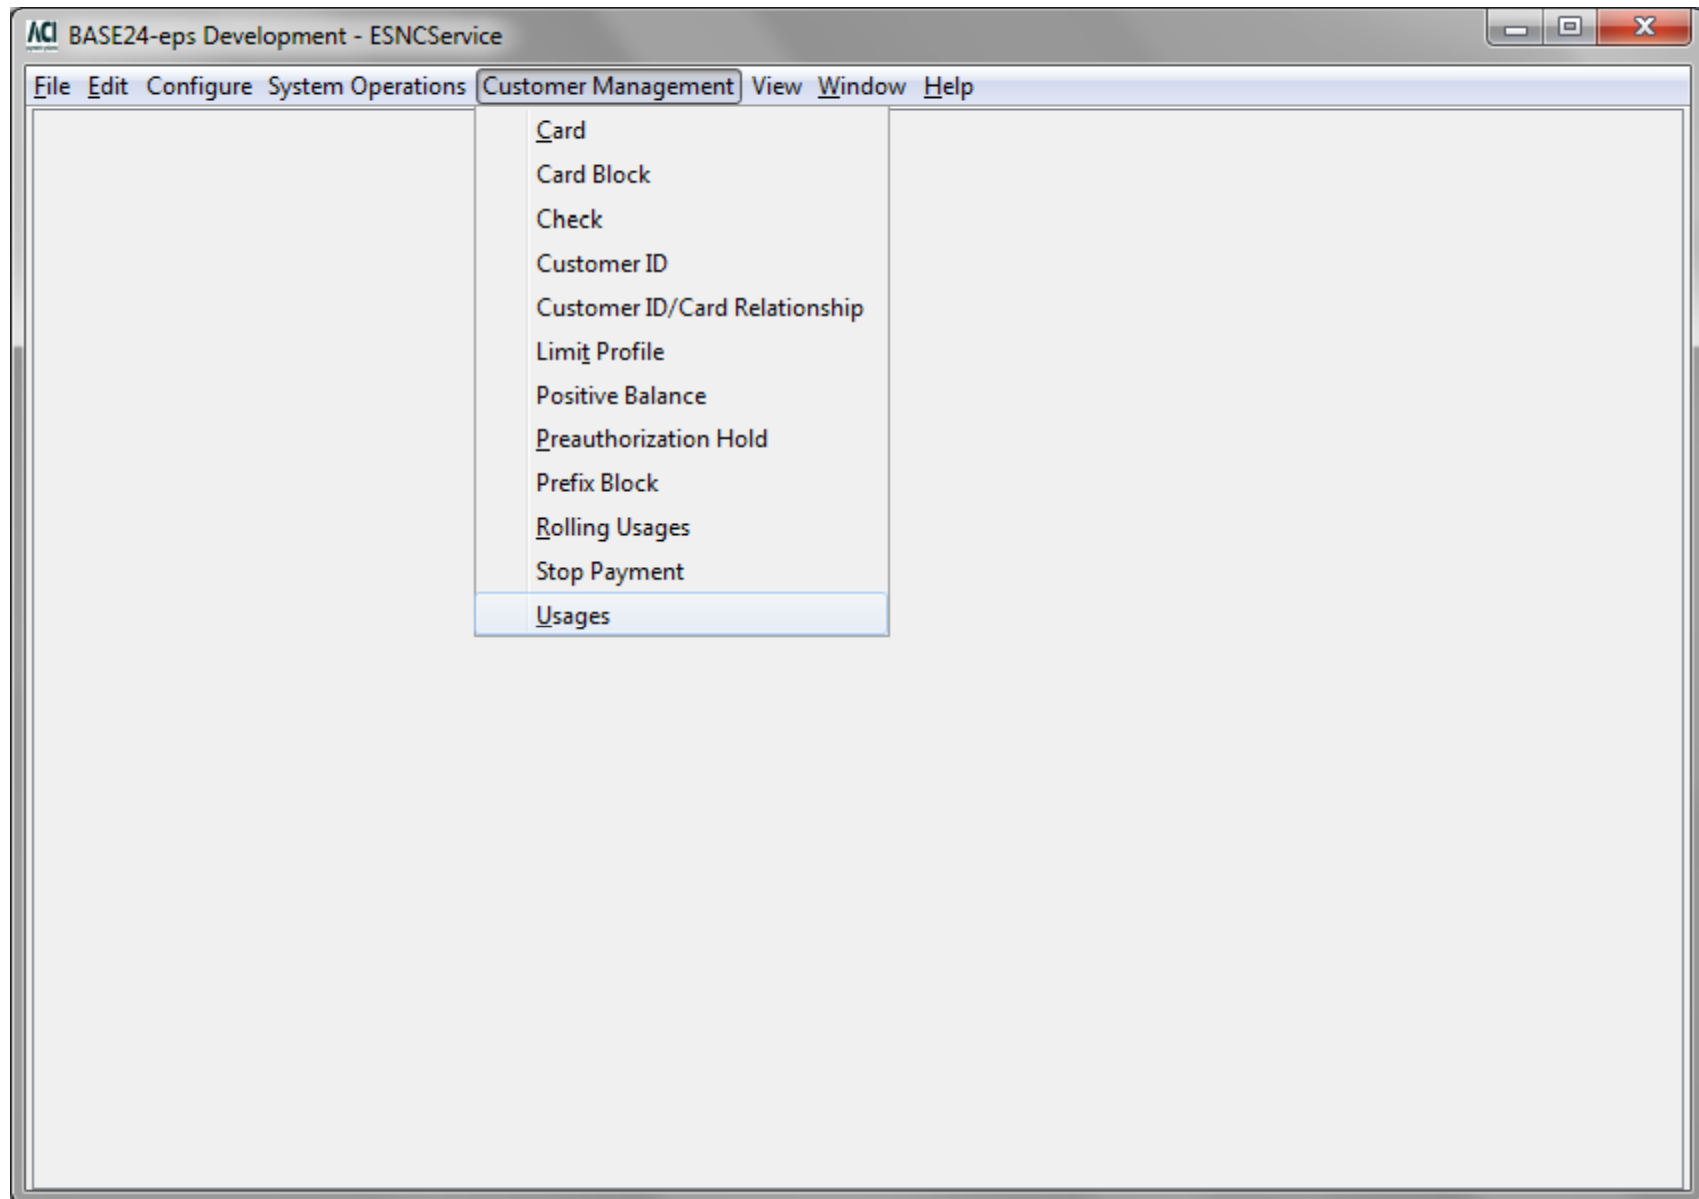

System Defined Usages

- System-defined usage names exist for Positive Balance usages data and are updated from a script:
 - AVAIL_yyyymmdd – The usage name for the available balance (debit account types)
 - LEDG_yyyymmdd – The usage name for the ledger balance (debit account types)
 - AVAILCR_yyyymmdd – The usage name for the available credit (credit account types)
- Note: Usages by these names are added to the Usages data source whenever AVAIL_BAL_DECR, AVAIL_BAL_INCR, LEDG_BAL_DECR, LEDG_BAL_INCR, AVAIL_CR_DECR and AVAIL_CR_INCR are used, respectively.
